Rhodanthe
anthemoides
Chamomile
Sunray

Lemon Beauty Heads
Calocephalus citreus

Daisy family, growing 20-50 cm high 30-60 cm wide. It has silver grey foliage and small, yellow button type flower heads in late Spring to Summer.

A close-up photograph of the plant Rutidosia leptorhynchoides. The image shows several bright yellow, spherical flower heads on green stems. The stems are covered in small, pointed, green bracts. The background is a soft-focus green, suggesting a natural habitat.

\$10 - PLANTS OF MELBOURNE'S WESTERN PLAINS

"A first class book on the plants of Melbourne's Western Plains, it also deals with the relevance & importance of attracting local wildlife to gardens."

Rodger Elliot AM,
leading horticulturalist and internationally
respected authority on Australian plants

"Not only will the gardener be inspired by the choice of plants to grow and the conditions to which they are best suited, but will learn about the flora and some of the fauna of this area."

Neville Walsh,
Senior Conservation Botanist,
Royal Botanic Gardens, Melbourne
